WORKPLACE HEALTH

URGENT CARE

Marque utilizes exceptional providers to deliver the best care possible to adults and children of all ages. We employ a large and diverse team of specialty physicians, which means our in-house expertise can address a variety of conditions and ailments accurately and promptly. Patients rate our medical care as “Excellent” over 98% of the time, and we utilize state-of-the-art technology to ensure our patients are offered the most cutting edge medical experience possible. We offer the ability to schedule appointments online with integrated text and email updates so that patients don’t have to wait at the clinic to be seen.

WELLNESS

Keeping you and your family healthy is our highest goal. That’s why we offer a variety of wellness services. From physicals to SmartBeat heart screening to physical therapy, our team has a passion for preventative care and health education. We help care for many acute and longer-term conditions such as cholesterol and high blood pressure. Our team works with a large network of highly-regarded specialists and imaging centers, and we can coordinate care with an expert in your area. At Marque, we do more than provide quality healthcare - we support the health of our community.

WORKPLACE HEALTH

Marque is truly unique in the way we operate. From drug screenings to wellness programs, we offer a wide range of occupational health and employment services. We utilize a large Medical Provider Network to treat and manage workplace injuries within an employer’s benefit plan. Our team is highly trained in this area of healthcare and our medical staff is the best in the business. Our approach focuses on getting our patients better fast, so they can get back to work quickly. We are the cost-effective alternative to expensive emergency room visits and a partner for your most valuable assets - your employees.

CONCUSSION MANAGEMENT

The Marque HeadStrong Concussion Program utilizes the FDA approved BrainScope® One device to assess brain injury. This device allows us to objectively assess the full spectrum of a brain injury, including concussions, by measuring and interpreting brain electrical activity and neurocognitive function—right at the clinic. BrainScope® One is the future of assessing brain injuries and unlike anything else available today. It’s FDA-cleared, radiation free, non-invasive, fast and efficient. We are experts in the field and the first stop to a safe and speedy recovery.
