## EMERGENCY ROOM

With CT scan

4-6 Hours

A CT scan is uncomfortable and time-consuming.

400x more than dental X-Ray

A single CT scan exposes you to far more radiation than a standard X-ray.

\$\$\$\$\$

Emergency room visits are expensive, especially when you add the cost of CT scans.

NO

A CT scan detects brain bleeds, but cannot assess concussions.

NO

If a brain bleed is not found on the CT scan, you may be discharged—perhaps with an undetected concussion.

VS.

## URGENT CARE

With BrainScope® One head injury assessment

Minutes >45

BrainScope One is non-invasive and patient-friendly.

Radiation exposure 0

The BrainScope One technology does not produce ionizing radiation. One less thing to worry about.

\$\$

BrainScope One is significantly less expensive than the ER and it's covered by most insurance plans.

YES

A BrainScope One assessment generates objective data that helps the provider determine whether you need a head CT and whether you likely have a concussion.

YES

If we diagnose a concussion or brain injury, you may be directed to our HeadStrong Concussion Program or sent for further testing.

### TESTIMONIAL

"I am grateful to have a place where I could come after sustaining a head injury. It's a relief knowing there is a device that can objectively look at my brain without the use of radiation. I felt confident in the physicians that helped me through my recovery and I know I made a right choice coming to Marque." Ryan P., Laguna Niguel

MEDICAL

## BRAINSCOPE® ONE HEAD INJURY ASSESSMENT

Offered exclusively by

**MARQUE**  
**HEADSTRONG**  
CONCUSSION PROGRAM

## WHY HEADSTRONG?

Our mission is to increase access to physicians and resources that are trained in the evaluation and management of concussions. Marque is unique because we created evidence-based concussion protocols that enable our patients to experience a full and speedy recovery. HeadStrong provides patients immediate access to innovative medical technology and resources, right in your neighborhood, 7 days a week.

## A DEVOTION TO PROVIDING EXPERT CARE

Our dedicated team helps coordinate the recovery progression and manages referrals to appropriate specialists when continued post-concussion symptoms exist. HeadStrong has an established network of highly regarded resources, ensuring that our patients are given the best care possible throughout the treatment and recovery process.

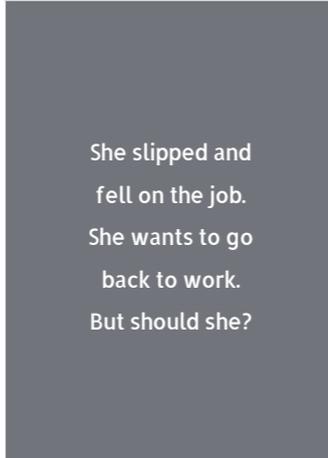

## WHAT TO EXPECT FROM A MARQUE VISIT

Marque HeadStrong Concussion Program delivers a systematic and thorough evaluation based on industry-leading guidelines and research. Depending on the severity of the injury, the Marque physician will establish a course of treatment that is appropriate and necessary for a full recovery. Patients are given specific return-to-activity instructions at each visit to follow so that they can track their healing progression. We will share and communicate to all interested parties any information that is critical to the recovery process.

You crashed into another player on the soccer field and you're feeling queasy. Is it stress or a concussion?

**BRAIN INJURY  
CAN HAPPEN TO ANYONE,  
ANYWHERE, ANYTIME.  
AND IT'S NOT ALWAYS  
EASY TO DETECT.**

She slipped and fell on the job. She wants to go back to work. But should she?

Your husband fell off his bike. He looks okay, but are you sure?

## FAST, OBJECTIVE ASSESSMENT AT THE POINT OF CARE.

The BrainScope® One device lets us objectively assess the full spectrum of brain injury, including concussions, by measuring and interpreting your brain electrical activity and neurocognitive function—right at the clinic. It's the future of assessing brain injuries and unlike anything else available today.

BrainScope® One was commissioned by the U.S. Department of Defense, the NFL/GE, Johns Hopkins, and the NYU School of Medicine. BrainScope® One is the winner of the NFL Head Health Challenge. BrainScope® One is:

- Covered by most insurance plans
- FDA-cleared
- Radiation free
- Accurate and objective
- Fast and efficient
- Non-invasive
- For use within 3 days of head injury

## ABOUT THE TECHNOLOGY

The patent-protected BrainScope technology platform integrates databases of thousands of brainwave recordings with advanced digital signal processing, sophisticated algorithms, miniaturized hardware and disposable headset sensors, which are only available in the revolutionary BrainScope One device. It eliminates unnecessary ER visits and radiation exposure, and reduces costs incurred by the patient, resulting in a better overall benefit.
